

SAI POOJITHA PATANGE

Memphis, TN | +1 (940) 331-4031 | saipoojitha0798@gmail.com | [Portfolio](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

- Business Intelligence and Data Analyst with 4+ years of experience delivering reporting, analytics, data modeling, and automated data solutions across healthcare and business environments.
- Experienced in analyzing claims, provider, payment, operational, sales, and financial data using SQL, Python, Power BI, Tableau, and cloud data warehouses.
- Builds reliable reporting datasets, dimensional models, KPI frameworks, dashboards, and validation processes that strengthen reporting accuracy, operational visibility, and business decision-making.
- Translates stakeholder requirements into scalable analytics solutions, with strong experience in healthcare claims, operations reporting, business performance analysis, and cross-functional BI delivery.

TECHNICAL SKILLS

Programming & Analytics: SQL, Python, Pandas, NumPy, Statistical Analysis, Trend Analysis, Variance Analysis, Root-Cause Analysis

Business Intelligence & Visualization: Power BI, Tableau, SSRS, Excel, Dashboard Development, KPI Reporting, Executive Reporting, Ad Hoc Analysis, Self-Service BI

Databases & Data Warehousing: Amazon Redshift, SQL Server, Oracle, Cassandra, MongoDB, MySQL, Data Warehousing

Data Modeling & Architecture: Dimensional Modeling, Star Schema, Snowflake Schema, Fact & Dimension Modeling, Analytical Data Models, Semantic Reporting Structures

ETL & Data Integration: SSIS, Informatica, ETL Pipelines, SQL Pipelines, Data Transformation, Data Integration, Reporting Automation

Data Quality & Governance: Data Validation, Data Reconciliation, Data Quality Checks, Data Accuracy, Reporting Standardization, Audit Reporting

BI Engineering & Performance: Advanced SQL, Query Optimization, Dashboard Performance Optimization, Reporting Workflow Automation, Metrics Development, Data Mining

Business & Healthcare Analytics: Claims Analytics, Provider Analytics, Payment Analytics, Healthcare Operations Analytics, Business Performance Analysis, Forecasting

Delivery & Collaboration: Agile, Requirements Gathering, Stakeholder Management, Cross-Functional Collaboration

PROFESSIONAL EXPERIENCE

Data Reporting Analyst

Jan 2024 – Present

BlueCross BlueShield of Tennessee | Memphis

- Consolidated claims, provider, payment, and operations data using SQL across Amazon Redshift, Cassandra, Oracle, and SQL Server, lowering cross-source reporting mismatches by 32% and creating more reliable datasets for business teams.
- Automated recurring reporting workflows with Python, SQL, SSIS, and Informatica, reducing preparation time from 3 hours to 45 minutes and helping operations teams receive scheduled reports faster.
- Designed dimensional models with advanced SQL, Star Schema, Snowflake Schema, and Fact & Dimension Modeling for claims and payment analytics, increasing dashboard query performance by 40% and supporting faster ad hoc analysis.
- Created 8 Tableau and SSRS dashboards for claims turnaround, provider performance, payment accuracy, and operational trends, giving finance and operations leaders clearer visibility into day-to-day performance.
- Applied SQL- and Python-based validation, reconciliation, and quality checks to claims and payment data, strengthening data accuracy and helping audit teams prevent inconsistencies from reaching downstream reports.
- Translated finance, operations, regulatory, and audit requirements into KPI definitions, SQL datasets, analytical data models, and executive reports through Agile collaboration, keeping business and audit reporting aligned with operational needs.
- Built reusable reporting datasets and semantic reporting structures with SQL, Tableau, and SSRS, supporting self-service BI and decreasing repeated manual data requests from business users.
- Evaluated claims volume, provider activity, payment trends, and operational exceptions using SQL, Python, trend analysis, variance analysis, and root-cause analysis, helping teams identify issue drivers and respond to performance gaps sooner.

Data Analyst

Oct 2023 – Jan 2024

RB Consulting Inc | Texas

- Combined client, sales, and operational data using SQL, Python, MongoDB, and Excel, creating dependable reporting datasets that lowered preparation issues by 28% and supported recurring business analysis.
- Reworked revenue and delivery data into fact and dimension tables with SQL and dimensional modeling, helping queries run 35% faster across recurring reports.
- Created 6 Power BI dashboards for revenue, delivery, and operational performance, giving leadership a clearer view of trends, exceptions, and business priorities.
- Automated recurring reporting with SQL pipelines, cutting turnaround from 2 hours to 20 minutes and making updated performance data available earlier in each review cycle.
- Performed business performance analysis with SQL, Python, trend analysis, and variance analysis across operating costs, delivery trends, and workflow gaps, helping teams identify process issues and prioritize follow-up actions.
- Added SQL- and Python-based validation and reconciliation checks to recurring reports, helping stakeholders catch inconsistencies earlier and avoid downstream corrections.
- Managed stakeholder requirements through Agile collaboration and translated business and delivery needs into KPI definitions, analytical datasets, and Power BI reports aligned with client and operational priorities.
- Organized reusable SQL datasets and self-service reporting structures, giving business users more consistent access to key metrics while reducing reliance on manual analyst support.

Data Engineer Intern

Jun 2023 – Oct 2023

Tekninvaderz | Florida

- Built revenue, user-activity, and operations datasets with SQL and Python, giving reporting teams cleaner inputs and raising performance-monitoring accuracy by 25%.

- Converted raw source data into analytics-ready Amazon Redshift tables through SQL and Python transformations, lowering report-preparation effort by 35% and making recurring reporting more reliable.
- Modeled reusable fact and dimension tables with SQL and dimensional modeling, giving analysts a cleaner structure for revenue and operational reporting.
- Tuned Redshift datasets and SQL queries used by BI reports, boosting refresh performance by 30% and helping business users access updated information with less delay.
- Standardized commonly used SQL datasets and transformation logic in Amazon Redshift, decreasing repeated business-team data requests by 28% and creating a more consistent reporting base.
- Worked with analytics and business teams through Agile delivery to turn reporting needs into KPI logic, SQL datasets, and dashboard-ready structures, keeping outputs aligned with day-to-day operational requirements.

Associate Engineer

Apr 2021 – Dec 2021

Cotiviti India Pvt Ltd | India

- Optimized healthcare claims and payment queries in Amazon Redshift using SQL, boosting reporting performance by 30% and helping audit teams review large datasets more efficiently.
- Built dimensional reporting tables for claims, utilization, and payment analysis, giving operations teams a more structured view of recurring healthcare data.
- Applied data mining and statistical analysis with Python, Pandas, and NumPy to investigate utilization and fraud-related patterns, helping analysts complete healthcare reviews 20% faster and focus sooner on higher-risk activity.
- Standardized SQL calculation and transformation logic across reporting datasets, cutting metric inconsistencies by 25% and keeping audit outputs more consistent.
- Validated claims and payment data through SQL-based reconciliation and quality checks, helping BI users catch discrepancies before they affected downstream reports.
- Reviewed claims volume, payment activity, and utilization trends using SQL and Python, giving operations teams clearer context for prioritizing follow-up investigations.
- Converted audit and operations requirements into KPI definitions, SQL datasets, and reporting structures, helping stakeholders use more relevant analytics during payment-review workflows.
- Organized reusable Amazon Redshift datasets and reporting logic for recurring healthcare analytics, lowering data-rework requests by 30% and giving analysts a more dependable reporting base.

PROJECTS

Sales Performance Optimization and Forecasting

- Consolidated multi-source sales data using SQL, MySQL, Python, and SSIS into dimensional datasets supporting sales, inventory, and demand analysis for consistent executive reporting.
- Developed ARIMA and exponential-smoothing forecasting models with Python, Pandas, and NumPy, increasing forecast accuracy by 20% and supporting more informed inventory-planning decisions.
- Built Tableau dashboards covering revenue, seasonality, demand trends, and KPI performance, giving leadership clearer visibility into sales patterns through interactive drill-down analysis.

Vehicle Fuel Cost Consulting

- Structured fuel-economy and vehicle-performance data with SQL, creating consistent analytical datasets for comparing vehicle cost, fuel efficiency, and overall performance.
- Developed cost, fuel-efficiency, and performance metrics using SQL and Python, enabling stakeholders to compare vehicle categories and evaluate cost-optimization opportunities.
- Created interactive Tableau dashboards with filters, comparative views, and drill-down analysis, helping stakeholders assess fuel trends and vehicle-selection alternatives in one reporting view.

Healthcare Operations Performance Analytics

- Transformed healthcare operations and claims data using SQL, Python, and Amazon Redshift into dimensional datasets supporting claims volume, turnaround, and processing-performance reporting.
- Developed standardized KPI logic for claims volume, turnaround time, and processing accuracy using SQL and Python, creating consistent measurement across healthcare operations reports.
- Created Tableau dashboards with trend analysis and drill-down reporting, helping operations teams identify performance patterns and investigate process variation more efficiently.

EDUCATION

Master's in Computer and Information Sciences

Jan 2022 – May 2023

Wichita State University | Kansas, USA

Bachelor's in Electronics and Communication Engineering

Aug 2016 – Oct 2020

Malla Reddy Institute of Engineering & Technology | Hyderabad, India
